LOCAL
325
FREDERICTON, NB

BUSINESS MANAGER'S LETTER TO THE MEMBERSHIP

Firstly, I would like to thank the entire membership for the opportunity you have given me to represent UA Local 325 as your Business Manager/ Financial Secretary. The great amount of support I have received throughout the past few years has been very encouraging. I appreciate all of your letters and emails, and I am continuing to be focused on the betterment of UA Local 325.

As you may be aware, the local has been positively progressing over the past few years with valuable upgrades such as the dispatching program, voice broadcast system, out of work lists, updated by-laws, and our website (www.ualocal325.ca) We have also seen beneficial changes to our health and welfare plan including:

- New Prescription Drug Card implemented
- Basic Dental increased to 100%
- Major Dental increased to 70%
- Dental Deductible of \$25 has been Removed
- Spouse/Dependant Life Insurance Increased to \$10,000
- New Employee Assistance Program (see the Local 325 website)
- Eye Exams covered at \$100 every three years for retired members on the Retiree Benefit Plan
- Lenses and Frames covered at \$300 every three years for retired members on the Retiree Benefit Plan

Effective January 1, 2013, the NB Pipe Trades pension plan changed to a shared risk plan. The primary purpose of the plan is to provide secure pensions to eligible members at their normal retirement date, for their

lifetime, in respect to their service as a member. A shared risk plan is a risk-focused management approach, which delivers a high degree of certainty that base benefits can be met in the vast majority of potential future economic scenarios.

Currently, the board of trustees has seven money managers; each manager specializes in different kinds of funds including bonds, Canadian equity, foreign equity, fixed income, infrastructure, etc., which provides this pension plan with a well-balanced portfolio. Due to the diversity of the portfolios, of our current money managers, the rate of return for the NB Pipe Trades shared risk plan for 2013 was 6.55%, and the current year-to-date rate of return for 2014 is 7.98%, each of which are in line with the rate of return specified in the funding policy that is required to meet the primary risk management goals.

Throughout the year, we host several informative pension seminars across New Brunswick. If you have not had the chance to attend one of these seminars or would like to attend another, please phone our office for further information and upcoming dates.

An important event happened August 19, 2014 when the Minister of Post-Secondary Education, Training and Labour announced that the steamfitter/pip-fitter is now a compulsory trade. This means that you will have to either be a journeyman with a certificate of qualification, or an indentured apprentice to work at the steamfitter/pipefitter trade; this is great news for the UA in New Brunswick.

The United Association and Trans Canada have created a partnership to start training for the Energy East Pipeline. On August 19, 2014, Trans Canada delivered three sections of large bore 42" and 48" pipe to our training centre in Miramichi. We will be announcing some training courses for welding and cutting in the near future.

Recently, we have completed the HVAC negotiations; our ratification vote was held June 5 with an approval rate of 90%. The new collective agreement has been signed by all parties as of the end of August 2014, and will be retroactive to May 1, 2014. The agreements have been sent to print, and the membership will be notified when they become available.

Lastly, I would like to recognize the Brothers and Sisters of UA Local 325 for the high level of professionalism and dedication you display while representing the UA on our job sites. This continues to prove to our contractors and clients that the UA is the definitive choice when needing to complete work in the piping industry.

I remain, fraternally yours,

Bruce Myles
Business Manager
UA Local 325

LOCAL 325 REPORTS

ANDY O'HEARN, AGENT ORGANIZER, MONCTON AND SURROUNDING AREAS

The Moncton and surrounding area has had a solid commercial market for many years now, and the future looks very promising. There are three major projects that have been announced and should be off the ground by early 2015. The first is the expansion to the George Dumont Hospital; the ground work for the first phase has already begun.

The second project is the convention center with an NHL size arena. The arena will be located in downtown Moncton on the Highfield Square property where demolition has already begun. A funding announcement was made in August to help progress the start date of this project.

The third project is an upgrade to the sewage treatment plant in Riverview.

The project is to put clean water back into the Petitcodiac River so that it can be, once again, used for recreational use.

Several projects in the area near the end of construction, if not already completed, are the new Moncton High School, Villa Maria, the Moncton hospital oncology expansion, and the Mount Allison University arts building. We are looking forward to the start of the Villa de Repos senior home expansion; the original home was also completed by UA contractors in 2005.

Upcoming projects include a new commercial kitchen at the Dorchester Penitentiary by Moncton Plumbing, as well as a new addition by George's Plumbing and Heating to expand the Moncton airport. The airport was

also completed by UA contractors in 2003. Moncton Plumbing will also be a part of the new Cabela's store being constructed in Moncton. Bass Pro Shops, also new construction, will be taking over the Crystal Palace complex in Dieppe. Princess Auto also has a new building under construction, and the mechanical work is being completed by Ermen Plumbing and Heating.

I would like to thank all of the members for your support, and I wish everyone the best.

A handwritten signature in blue ink that reads "Andy O'Hearn". The signature is fluid and cursive.

Andy O'Hearn
Local 325 Agent Organizer

MONCTON HIGH SCHOOL

RICK SMITH, TRAINING CO-ORDINATOR, JATC

THE JATC

This has been a very busy year for the UA/MCA JATC. In the fall of 2013, the Standard for Excellence (SFE) working group created a three hour presentation focused on the UA's Standard for Excellence Policy. The presentation explains the roles and responsibilities of the employer as well as the roles and responsibilities of the key players on the contractor's team. Also spotlighted, is the important role played by UA supervision on our job sites across New Brunswick along with the UA rank and file member who are critical to our success in New Brunswick.

The government recently announced the Steamfitter/Pipefitter trade as a compulsory occupation in the province of NB. This announcement will see the JATC working with the province to organize a red seal preparation course to assist members in challenging the Red Seal exam.

Please take a minute to review the dates in your NBCSA Safety Passport to ensure your safety courses are current; you are responsible in maintaining current safety training in order to be eligible for dispatch in New Brunswick. Course registration policies are set by the New Brunswick Construction Safety Association (NBCSA). You can renew your Confined Space course online if you renew within 90 days of the expiry date. If you miss the date, you are required to repeat the two day course. If you have completed an online refresher for Fall Protection, you are required to take the in-class course when your ticket expires. Please do not wait until the last minute to try and renew your ticket as there may not be a course scheduled or seats may not be available. Finally, NBCSA requires two full business days notice to remove a participant from a class without charge. If monies are outstanding for a

no-show, the JATC is unable to register you for any further training.

A class list is being created for the following courses to run during the fall and winter, please call our office either toll-free at (877) 622-1570, or, if calling from outside NB, (506) 622-0219 to have your name added to the list:

- NAUSC Foreman
- NASUC Steward
- NAUSC Inspection Testing and Maintenance
- Tube Bending
- Seismic Bracing
- Underground Installation
- Red Seal Prep for Steamfitter

Rick Smith
Training Co-ordinator

GEORGE ESTEY, AGENT ORGANIZER, MIRAMICHI AND SURROUNDING AREAS

are currently pricing a piping modular unit(s) project for Western Canada, which would bring in a significant amount of work for fabricators and metal trade support.

We have had and continue to have much success with commercial work in the area. Upcoming work includes Beaulieu Plumbing and Mechanical Inc., who will be completing work on the new seniors' home in Neguac, which will commence shortly. The new Blackville Fire Department has been awarded to Ermen Plumbing and Heating. The Mount St. Joseph's Senior Home retrofit Phase 1 was secured by Godin's Electric, Phase 2 by Moncton Plumbing, and the sprinkler portion was captured by Vipond.

Current projects winding down or recently completed include: The Atlantic Institution in Renous by George's Plumbing, and the NBCC Miramichi

campus by Moncton Plumbing and Viking.

Future projects awaiting tender or awards include the Federal Payroll Center, a new school to replace Croft Elementary School, and a special care home for patients suffering from dementia or Alzheimers in Miramichi.

A pending project still in the early stages of planning for the old UPM site would consist of a partnership of investors falling under the parent company "Miramichi Fibre Processing" with four subsidiaries being a new sawmill, an attached pellet plant, an engineered beam manufacturer utilizing low grade pulpwood, and a hog fueled power generating plant supplying cheap powder to the other three. The first stage was just announced whereby a feasibility study will be carried out on the proposed pellet plant that would utilize the sawmill by-product(s).

We are moving along with the process of getting welding procedures registered to Local 325. Once the procedure is registered, our welders can complete up to a total of three performance tests which will cover a wide range of procedures our employers currently utilize but would not have to test our members for. Local 325 will be able to issue an ASME 484A document, which would state the welder's performance qualifications (WPO). This document would be stamped by the government department, Welding Inspector/Safety Code Services, verifying the welder tested successfully under the supervision of the government inspector. NB Safety Code Services would allow the employer to use our 484A form versus testing the welder. A nominal fee would be paid by the contractor and a

(job) ticket would then be issued under the matching company's procedure. This system will ensure our members are more job-ready and will allow more employment opportunities as current ticket requirements are becoming the norm in many other UA jurisdictions.

I hope everyone enjoyed their summer, and I wish everyone the best in the year to come.

George Estey
Local 325 Agent Organizer

NEW BLACKVILLE FIRE DEPARTMENT

MICHEL MALTAIS, AGENT ORGANIZER,
NORTHERN NEW BRUNSWICK

Work in the northern part of New Brunswick has been fairly steady over the past year beginning with the new Restigouche Regional Hospital in Campbellton. Since the beginning of August 2012, Life Safety Systems has been working on the sprinkler portion of this project, while Beaulieu Plumbing has been working toward completing the plumbing side of the job. Together, this project has employed approximately seventy-two UA Local

325 members. The hospital is expected to be completed late 2014.

Another fair-sized project being completed by two UA contractors is the Eel River Crossing power transfer station, which has employed more than thirty UA Local 325 members including pipefitters, plumbers, apprentices, and welders. Black and McDonald and Sunny Corner Enterprises began this project late April 2014, and are expecting it to be completed early fall 2014.

Atlantica Mechanical began renovations to the intensive care unit at the Bathurst Chaleur Regional Hospital early March 2014 and has employed approximately twelve UA Local 325 members of various trades. The renovations are expected to conclude in September.

There have been a few other jobs throughout the year including Maritime Boiler Repair completing work in multiple fisheries plants and Black and McDonald at the Belledune Smelter.

Future work in this part of the province looks promising with upcoming larger projects such as the Caribou Mine in Bathurst, the medical marijuana facility in Atholville, a new tank farm in Belledune, another renovation at the Bathurst Hospital, and the Oxford Blueberry Farm in Acadian Peninsula.

I would like to thank everyone I have had the pleasure of working with throughout the past year, whether it was in a classroom, while I was teaching multiple training courses for our training centre, JATC, or on any one of our union job sites. Our members have demonstrated and continue to demonstrate what hard work and determination looks like, so keep up the good work.

Michel Maltais
Local 325 Agent Organizer

CREW AT EEL RIVER CROSSING, DALHOUSIE

CAMPBELLTON HOSPITAL

BRUCE MYLES, BUSINESS MANAGER, LOCAL 325

BUSINESS MANAGER'S REPORT

Work has been steady in the Fredericton/Edmundston area with ongoing projects such as the 180-room seniors' home in Edmundston being completed by George's Plumbing and Heating. There is another seniors' home going up in Perth Andover with work done by Black and McDonald. Beaulieu Plumbing and Mechanical Inc. also has The Edmundston Detox Center underway. Maritime Fiberglass is currently at full employment.

There have been many school projects taking place including two new schools in Woodstock with work being completed by Beaulieu Plumbing and Master Mechanical, a new school on Fredericton's north side being done by Beaulieu Plumbing, and the construction of the new Geary school outside of Fredericton by Moncton Plumbing.

More work in this area includes Direct Mechanical completing work at The Fredericton Woodlands Division,

Atlantica Mechanical is working at the Howistzer Maintenance Building on Base Gagetown, and Beaulieu Plumbing has been awarded the underground work at the Hampton Inn and Suites in Fredericton. We are hoping they are successful in being awarded the remainder of the contract.

The Nackawic shutdown with North York Industries is tentatively scheduled for October 14, 2014. This will last approximately seven to eight days. Construction on The Sisson Brook Tungsten Mine, which is 60 km northwest of Fredericton, is anticipated to begin mid-2015. It is expected to create 500 jobs while under construction, and employ 300 full-time employees once fully operational. The construction phase will last approximately 18-24 months.

Local 325 has sprinkler fitting jurisdiction for the entire province of New Brunswick and PEI. A few of the recent

sprinkler jobs include the new Fredericton Shannex awarded to Viking Fire Protection, Troy Life and Fire Safety will be completing a 79-unit apartment complex in Fredericton, the Charlottetown Driving Park (CDP) barn replacement will have work done by Vipond Fire Protection, and the Jodin Nursing home has work completed by LeBlanc Sprinkler.

Thank you, and best wishes for the remainder of 2014.

Bruce Myles
Business Manager, Local 325

VICTORIA GLENN MANOR, PERTH-ANDOVER

A LETTER FROM THE QCCC

Quality Control Council of Canada Conseil du contrôle de la qualité du Canada

Members of the Quality Control Council of Canada (QCCC) Atlantic Region have experienced a good work picture over the past few years. The work of our non-destructive technicians and heat treaters (comprised of the UA and Boilermakers) working in this specialized area are highly skilled and trained as such. The QCCC membership of UA Local 325 has a number of approximately 145. Many of these union members have certifications in the major disciplines of non destructive testing, such as liquid penetrant, magnetic particle, radiography, CWB visual, ultra-sonics, etc. The QCCC contractors have also hired on new trainees/helpers to hopefully gain the experience and skills to obtain certifications in the future, and move up the pay grid negotiated by the QCCC.

Bruce Myles, business manager of Local 325, staff, and members are always a wealth of information and help us problem solve any issues or concerns that may arise in the Atlantic region. We are currently preparing our QCCC membership meetings throughout the regions for upcoming negotiations. Our current collective agreement expires at the end of April 2015. We are looking forward to a good round of negotiations for the QCCC nationally and all regions for our members. With the amount of proposed shutdown, maintenance, nuclear, oil-refinery and others, we are looking forward to adding good technicians to our membership in the future. With the Energy East Pipeline and all its components being talked about, and hopefully constructed in New Brunswick, this will

also employ many NDT technicians. We are keeping a close eye on these announcements for our members and contractors.

Members of the QCCC are your brothers and sisters. Please do not hesitate to ask them for union credentials. We are part of the family.

Yours in solidarity,

A handwritten signature in blue ink that reads "Dave Griffiths".

Dave Griffiths

LOCAL 325 MEMBER ACCOMPLISHMENTS

DENIS LEVESQUE WITH HIS WIFE AND SONS

LOCAL 325 MEMBER ERIC LECLERC

LOCAL 325 MEMBER JOSH CANNING

Congratulations to Local 325 HVAC apprentice **Denis Levesque** of Sainte-Anne-de-Madawaska on receiving first place in the skills competition in Newfoundland. Sprinkler apprentice, Shane McKinney of Saint John, and plumbing apprentice Kevin Kenny of Shediac River also took part in their respective competitions.

Congratulations to **Eric LeClerc** of Upper Kingsclear and **Josh Canning** of Riverview for making the top marks in their respective classes this year. They were both awarded with a \$500 bursary. Eric is now a journeyman plumber and pipefitter, and Josh is a journeyman plumber.

From left to right, back row: Agent Organizer Michel Maltais, Training Co-ordinator Rick Smith, Local 325 member Shane McKinney, and Agent Organizer George Estey. **Front row:** Local 325 member Kevin Kenny, Local 325 member Denis Levesque, Local 325 Business Manager Bruce Myles, and Agent Organizer Andy O'Hearn.

Congratulations to one of the recipients of the 2014 **Matt Bakker** Scholarship Award, Sheldon Clowater, son of UA 325 QCCC member Evan Clowater of Minto. We wish Sheldon the best of luck with his studies.

Local 325 pipefitter **Bruce Scott** (left), and Local 325 pipefitter & welder **Michel Noel** (right) receiving safety excellence awards.

PO BOX 1060 Station A
Fredericton NB E3B 5C2

SUBJECT: NB POWER EEL RIVER CONVERTER STATION REFURBISHMENT
Dear Bruce:

I would like to express Black & McDonald's satisfaction with the performance of our UA employees during the installation of HVAC equipment and piping at the NB Power Eel River Crossing station project completed this past summer.

Work was performed at our expected level of productivity while following all of our safe work practices. More importantly, the attitude of the entire team was positive, where everyone on site cooperated for the successful completion of this project.

I would also like to express a special appreciation to Michel Noel and Bruce Scott for their quick actions during the emergency situation where a worker from another company on site was severely injured. Their actions have been recognized by both NB Power and Black & McDonald during our last quarterly safety meeting.

Congratulations on a job well done.

Sincerely,

Charles Savoie
